Greetings

To Our Friends:

It is with pleasure that we present you with our Dahlia Catalog for 1937. Your generous and kind support is thoroughly appreciated and inspires us to continued efforts to make available to you only the best.

This catalog would not be complete if we were not to take advantage of the opportunity to thank you for your many letters telling of success obtained from stock purchased from me. We are grateful to those who have been able to visit our gardens as well as those who have inspected our exhibits at many of the shows we attended.

To those who are familiar with our stock, no introduction is necessary and you have our word that the same quality will not only continue, but improve if such is possible. To those who have not tried our service, this is an invitation, that will prove a real opportunity for you to realize something you may not have been able to obtain elsewhere. No order is too small nor is any contract too large. We are pleased to serve you.

Mr. Gordon Waaser, of Baldwin, N. Y., will grow all our seedlings for the New York Show this coming season.

Canadian Regulations—To import plants, bulbs, roots and other nursery stock into Canada, a special permit must be obtained from the Secretary of Destructive Insect and Pest Act Advisory Board, Dept. of Agriculture, Ottawa, Ontario. He will issue the permit and supply information as to how it is to be used.

O. B. Geer

Our Guarantee

That our roots, plants and rooted cuttings are absolutely free from disease, are true to name, and will grow as we describe them.

Our stock is sold at prices that are as reasonable as it is possible to make them, and where we have large stock of some varieties our prices are lower than of those that send our inferior roots.

We ship all orders prepaid, by parcel post or express so that you need not spend another cent after your order is paid to us. We see to it that your roots, plants or rooted cuttings will arrive safely and in good condition.

We always include in our orders a surprise to you by including some variety of merit.

While we grow close to 400 varieties, both American and European, many of which we have not enough stock to list, as among these are new creation that will be released later by their originator, or by us as sale distributors, as well as introducing our own originations.

While we maintain a trial gardens for our customers and other growers, in testing out seedling of which we make no charges, we must ask that our good friends write us before shipping any seedlings.

May we ask that your order be sent to us as early as possible, so that we may not be obliged to tell you we are sold out of some varieties.

CHRYSANTHEMUM

We are very sorry that we cannot go into detail and name all the varieties of Chrysanthemum we have. We shall have pot plants of large number of good varieties. If you will write us and tell us of those you wish, we shall be pleased to advise you of prices. We are listing only a few that are new and have been a sensation the past season.

PINK CUSHION—This chrysanthemum has been the leader of all. It has had as many as 2800 blooms on a single plant the first year. You can always look for about 600 blooms of a beautiful shell pink.

Plants 35c each; 4 for \$1.00

NEW KOREAN CHRYSANTHEMUMS

(Early October Flowering)

CERES—A lovely combination of old gold, chamois-yellow, and soft coppery bronze. The mature flower petals appear as if dusted with gold. A beautiful bit of color for the Fall garden.

DAPHNE—An exquisite blending of daphne-pink, with an underlying sheen of lilac-rose, enhanced with prominent golden stamens in the center. Flowers carried in graceful sprays, are especially frost-resistant.

DIANA—Chatenay-rose-pink, mingled with lilac-rose and soft salmon, the tones of which vary with the degree of light. The triple rays of petals give an appearance of fullness that is nonetheless dainty.

MARS—Deep amaranth-red, changing to wine-red, overlaid with a velvet sheen. A distinct and striking color-effect.

MERCURY—The opening flower is oxblood-red, changing to coppery bronze, and finally to an exquisite blend of old rose and salmon which is retained long after the flower matures.

Plants 35c each, 4 for \$1.00; \$2.50 doz.

DELPHINIUM—From the choicest that we have been growing for the past seven years. This is the first year that we have offered these.

One year plants 50c each; Potted seedlings 15c each; Choice seeds in the Fall at 25c Pkt.
